
Using new tools to streamline data on your project.

HDR has partnered with clients to shape communities and push the boundaries of what's possible since 1917. We specialize in engineering, architecture, environmental and construction services. With nearly 10,000 employees in more than 225 locations around the world, we think global and act local.

hdrinc.com

Streamlining wetland determinations in four key ways:

COLLECT
Mobile app designed around U.S. Army Corps of Engineers regional standards for site vegetation, soil and hydrology, eliminating time needed for transcription or calculations.

INTEGRATE
Site data, locations and photos integrate from the moment information is collected.

REVIEW
Web portal provides instant access to data for review and quality control.

REPORT
On-the-fly map creation and report generation following, regional supplement requirements.

Leading the way in technology with the **Fen Wetland Mobile Tool**

Our mission is streamlining your environmental regulatory and permitting needs with mobile and web technology. Fen **improves field data collection workflows**; allowing our scientists to concentrate on the environment around them, not the technology used to document it.

Fen uses secure web and mobile components, built to follow U.S. Army Corps of Engineers reporting requirements. Office and field staff check data accuracy and thoroughness in almost-real-time, helping to reduce costs and enabling our field professionals to focus on the highest priorities.
